Regarding Topic Areas:

Comment/Suggestion:

Hi,

I think it would be important to include the Oregon Nearshore Marine Management Strategy to the document section of this web site.

The Nearshore Strategy is looks at nearshore marine fish and wildlife and addresses management issues in a broader social and ecological context. The Strategy does not create or recommend any specific regulations. Rather it presents recommendations for management of marine fish and wildlife and identifies potential areas of opportunity for public or private entities, state and local agencies, and tribes to contribute to the sustainability of Oregon's nearshore resources.

Here is the web site that has electronic copies of the document  
<http://www.dfw.state.or.us/MRP/nearshore/document.asp>

Thanks,

Brandon Ford
