State(s): Oregon

Regarding Topic Areas:

* Scientific information, research, and monitoring

Comment/Suggestion:

I would like to applaud the completeness and timeliness of the West Coast Governors Agreement, as well as the explicit mention under the action plan portion of sea floor and habitat mapping, which will be critical tools to address issues of regional significance. Proper siting of wave energy towers is another activity that cannot be completed successfully without the sea floor mapping. As a member of the Oregon Territorial Seafloor Task Force, I would like to encourage the governors to continue working with us on funding this critical activity, especially given the recent failure of Oregon HB 2924 and SB 1054. Many thanks
